

# Application for Appraised Value Limitation on Qualified Property

(Tax Code, Chapter 313, Subchapter B or C)

**Form 50-296**  
(Revised July 2013)

**INSTRUCTIONS:** This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application.  
This notice must include:
  - the date on which the school district received the application;
  - the date the school district determined that the application was complete;
  - the date the school board decided to consider the application; and
  - a request that the comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original completed application to the Comptroller in a three-ring binder with tabs separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules as explained in the Confidentiality Notice below.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, make a recommendation to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application before the 151st day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to complete the recommendation, economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at [www.texasahead.org/tax\\_programs/chapter313/](http://www.texasahead.org/tax_programs/chapter313/). Qualifying Time Period usually begins with the final board approval of the application and extends generally for the following two complete tax years.

**Column A:** This represents the total dollar amount of planned investment in tangible personal property the applicant considers qualified investment- as defined in Tax Code §313.021(1)(A)-(D). For the purposes of investment, please list amount invested each year, not cumulative totals. [For the years outside the qualifying time period, this number should simply represent the planned investment in tangible personal property]. Include estimates of investment for "replacement" property-property that is part of original agreement but scheduled for probable replacement during limitation period.

**Column B:** The total dollar amount of planned investment each year in buildings or nonremovable component of buildings that the applicant considers qualified investment under Tax Code §313.021(1)(E). For the years outside the qualifying time period, this number should simply represent the planned investment in new buildings or nonremovable components of buildings.

**Column D:** Dollar value of other investment that may not be qualified investment but that may affect economic impact and total value – for planning, construction and operation of the facility. The most significant example for many projects would be land. Other examples may be items such as professional services, etc. Note: Land can be listed as part of investment during the "pre-year 1" time period. It cannot be part of qualifying investment.

Notes: For advanced clean energy projects, nuclear projects, projects with deferred qualifying time periods, and projects with lengthy application review periods, insert additional rows as needed.

This schedule must be submitted with the original application and any application for tax credit. When using this schedule for any purpose other than the original application, replace original estimates with actual appraisal district data for past years and update estimates for current and future years. If original estimates have not changed, enter those amounts for future years.

Detailed Description of the Project

Golden Pass Products (GPP) and Golden Pass Pipeline LLC (collectively, "Golden Pass") propose to own, site, construct, and operate a liquefied natural gas ("LNG") export project ("GPX Project"). The GPX Project consists of:

(1) The Export Terminal, which will be constructed adjacent to the Golden Pass LNG Terminal LLC ("GPLNG") import terminal site, located onshore at the Sabine-Neches Waterway in Jefferson County, Texas; and

(2) Additions to the existing Golden Pass Pipeline LLC system ("GPPL") by construction of approximately a total of eight to ten miles of new 30- to 36-inch pipeline in two non-contiguous loops and up to four new compressor stations with all necessary integration interconnections for bi-directional service. Golden Pass Pipeline System is specifically excluded and not part of this Application for Limitation on Appraised Value of Qualified Property.

The GPX Project will be located on over 1,100 acres owned or controlled by GPP affiliates in Jefferson County, Texas. The GPX Project will allow Golden Pass to receive natural gas from domestic sources, convert natural gas to LNG, store, and export that LNG. The GPX Project will be constructed and operated contiguous to and integrated with the GPLNG terminal and GPPL. This will enable Golden Pass to maximize use of the existing GPLNG terminal and GPPL facilities, to provide for bi-directional service and thus allow for exportation and importation of natural gas. The total estimated capital investment of the Project for all three liquefaction trains in Sabine Pass ISD is approximately \$8.5-10 billion.

GPP will construct three liquefaction trains with a nominal total production capacity of 15.6 million metric tons per annum (MTPA) of LNG for export (each having a nominal throughput of 5.2 million MTPA). The Project is expected to be constructed in phases, with each LNG train commencing operations approximately six to twelve months after the previous train.

A separate Application for Limitation of Appraised Value of Qualified Property is being filed for each train. This application is for the second train of the Project and all newly installed and constructed supporting infrastructure improvements including, but not limited to, land improvements, tanks, intraplant piping, plant control equipment, pollution control equipment, buildings and associated equipment to support these major components.

The GPP Export Terminal includes, but is not limited to, the following major components described below.

LNG Liquefaction Export Terminal

The Project will entail construction of new liquefaction facilities, together with the integration to certain existing LNG import terminal facilities. All preexisting facilities, equipment, and buildings, are excluded from this application.

Specific new facilities include:

- a) Inlet gas treating systems utilizing amine for carbon dioxide, hydrogen sulfide removal followed by molecular sieve dehydration. Water and heavy hydrocarbons will be removed by dehydration units, scrubbers and separators.
- b) Liquefaction capability Train #2 will have a nominal throughput capacity of 5.2 MTPA. This process train will include the following components:
  - i. Propane pre-cooling, mixed refrigerant LNG process (also known as the C3MR process) utilizing two gas-fired turbines;
  - ii. Coil wound main cryogenic heat exchangers for liquefaction and sub-cooling.
- c) Associated utilities, equipment and air coolers.
- d) Interconnections to existing import facilities and controls.
- e) The addition of LNG storage tank pumps to accommodate loading operations.

Golden Pass Products LLC was formed by affiliates of Qatar Petroleum International (QP) and ExxonMobil. ExxonMobil has an extensive global position in LNG with interests in liquefaction capacity of approximately 65 million tonnes per year through their ventures in Qatar and Indonesia. In 2009, ExxonMobil and Qatar Petroleum started up three 7.8 million-tonnes-per-year LNG trains in Qatar, the largest in service anywhere in the world. ExxonMobil and QP have also added LNG regasification capacity with the opening of the South Hook Terminal in Wales and the Adriatic LNG Terminal offshore Italy, increasing access to attractive European markets.

In addition to the Asia Pacific, ExxonMobil and joint venture partners have sanctioned the Gorgon Jansz and PNG LNG projects and additional LNG projects are being pursued in Australia and West Africa. The extensive global experience of its two partners provides Golden Pass Products the technology, marketing and financial strength to construct a world-class liquefaction and export facility anywhere in the United States and around the world.

This represents the total dollar amount of planned investment in tangible personal property the applicant considers qualified investment - as defined in Tax Code §313.021(1)(A)-(D). Column C: For advanced clean energy projects, nuclear projects, projects with deferred qualifying time periods, and projects with lengthy application review periods, insert additional rows as needed. This schedule must be submitted with the original application and any application for tax credit. When using this schedule for any purpose other than the original application, replace original estimates with actual appraisal district data for past years and update estimates for current and future years. If original estimates have not changed, enter those amounts for future years.
