Calculating Motor Vehicle Years

"Motor vehicle years of insurance" means the total number of years or portions of years during which a motor vehicle is covered by insurance consistent with 43 TAC 57.48. The fee is equal to the number of motor vehicle years of insurance multiplied by \$5.

Each insurer, in calculating the fees established by Transportation Code, §1006.153, shall comply with the following guidelines:

- (1) The statutory fee of \$5 is payable on each motor vehicle for which the insurer provides insurance coverage during the calendar year regardless of the number of policy renewals;
- (2) When more than one insurer provides coverage for a motor vehicle during the calendar year, each insurer shall pay the statutory fee for that vehicle;

In the calculation of motor vehicle years, the following items should be noted:

- Policy cancellations for any reason have no effect on the fee amount due for the vehicles covered by such policies. Once a policy is delivered, issued for delivery or renewed during each semiannual period, the fee accrues. If a policy is written and later cancelled, the MVCPA fee would be due. A cancellation of an insurance policy for which no insurance coverage was provided results in no MVCPA fee due because there are no motor vehicle years of insurance for that policy.
- Endorsements deleting vehicles are treated in the same manner as a cancellation. If a vehicle is removed from a policy by endorsement, the full MVCPA fee is still due.
- Endorsements adding vehicles accrue "motor vehicle years" in the year of the endorsement.
- Vehicles substituted on existing policies by endorsement, if substituted concurrently, are subject to an additional fee.
- Policies delivered, issued for delivery or renewed with an effective period that extends into the next period or year will be counted 100% in the period or year of issue.
