Pricing Assumptions:

- Pricing for Expanded Packages apply only if the Basic Package is also purchased.
- National Add-on Package can only be purchased if the Basic Package is also purchased.

Catalog Pricing

Vendor must provide the State with a firm, fixed discount off their catalog in an effort to establish a not-to-exceed price for all non-packaged add-on services. Alternatively, vendors may submit a catalog with firm, fixed prices for these add-on services. If submitting firm, fixed prices, vendors must provide pricing for the Initial Term and all Renewal Years as outlined above.

Specialized Licensing

LexisNexis provides numerous subscription options for library patrons and librarians, as well as solutions for prisons. Pricing is customized pursuant to your particular needs. Please contact your LexisNexis representative for more details.

Investigative Services & Pricing

GENERAL INVESTIGATIVE SERVICES

Lexis Advance

Lexis Advance is an innovative and new pure web application designed to transform how legal professionals conduct online legal research. Built on a state of the art technology platform Lexis Advance allows primary researchers within the legal and professional organizations to easily and efficiently find highly relevant information easier than ever before, helping them to be more productive and drive better outcomes

Lexis.com

LexisNexis offers public records research capability through *lexis.com*. The user interface is identical to other *lexis.com* research screens for legal research, providing terms & connectors (Boolean) and Natural Language search logic.

SmartLinx

SmartLinx, accessible via *lexis.com*, lets you quickly comb through billions of records simultaneously, making it easy to connect names, addresses, phone numbers and other information with appropriate people, businesses and locations.

Completeness

Because of the verification and –cleansing process that SmartLinx uses, researchers can discover records they may never find otherwise (e.g., due to a misspelling of a name in the original public record, or name, address and phone number variations). SmartLinx helps you gain the most complete insight by accessing billions of reliable, indexed public records and delivering on-point results in an easy-to-read, tabular report.

Streamlining

SmartLinx eliminates duplicate public records, which are cumbersome and confusing to wade through, increasing agency efficiency.

Relevancy

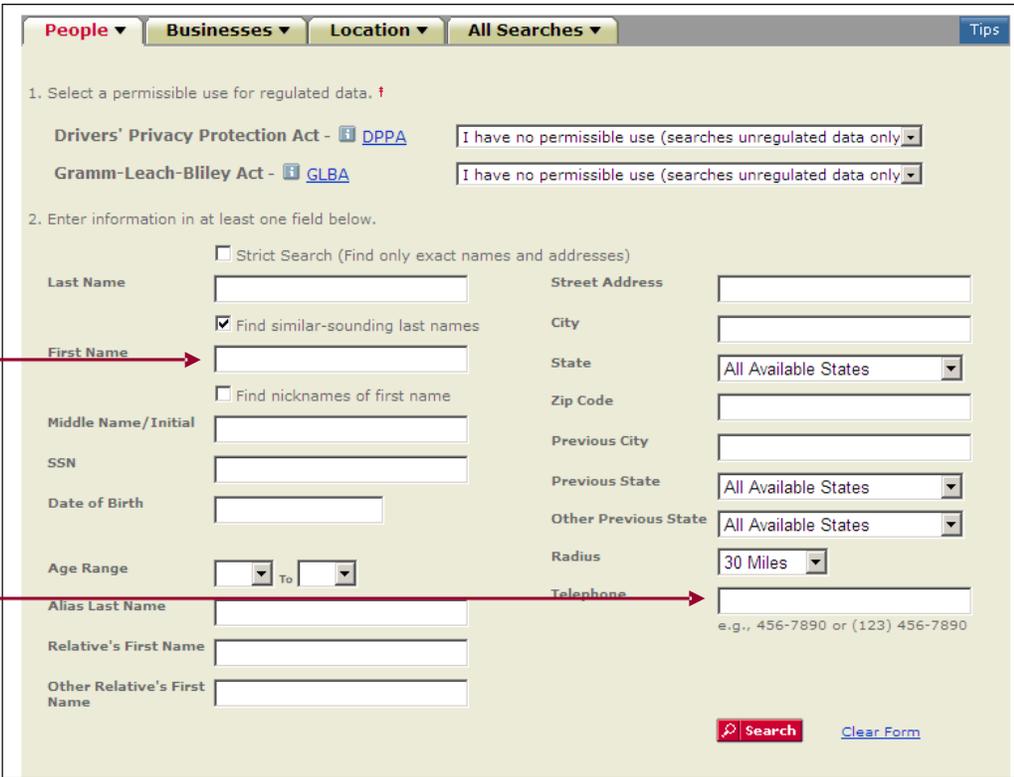

Results are displayed based on relevancy of results to original search terms. Search results allow users to validate quickly and easily that the individual cited in search results is the right person.

Cross-Referencing

SmartLinx reports link people to businesses, neighbors, relatives, licenses, property, addresses, phone numbers and more.

A "sounds like" ability helps you find variations and similar sounding names

Proximity searching lets you search for items within a radius of an address element (zip code, city/state), allowing you to get results if you know only the general area in which someone lives.

The image shows a web-based search interface for people. At the top, there are navigation tabs: "People", "Businesses", "Location", and "All Searches". Below these are two sections for regulatory compliance: "Drivers' Privacy Protection Act - DPPA" and "Gramm-Leach-Bliley Act - GLBA", each with a dropdown menu set to "I have no permissible use (searches unregulated data only)".

The main search area is titled "2. Enter information in at least one field below." and includes several options: "Strict Search (Find only exact names and addresses)" (unchecked), "Find similar-sounding last names" (checked), and "Find nicknames of first name" (unchecked). The form contains the following fields:

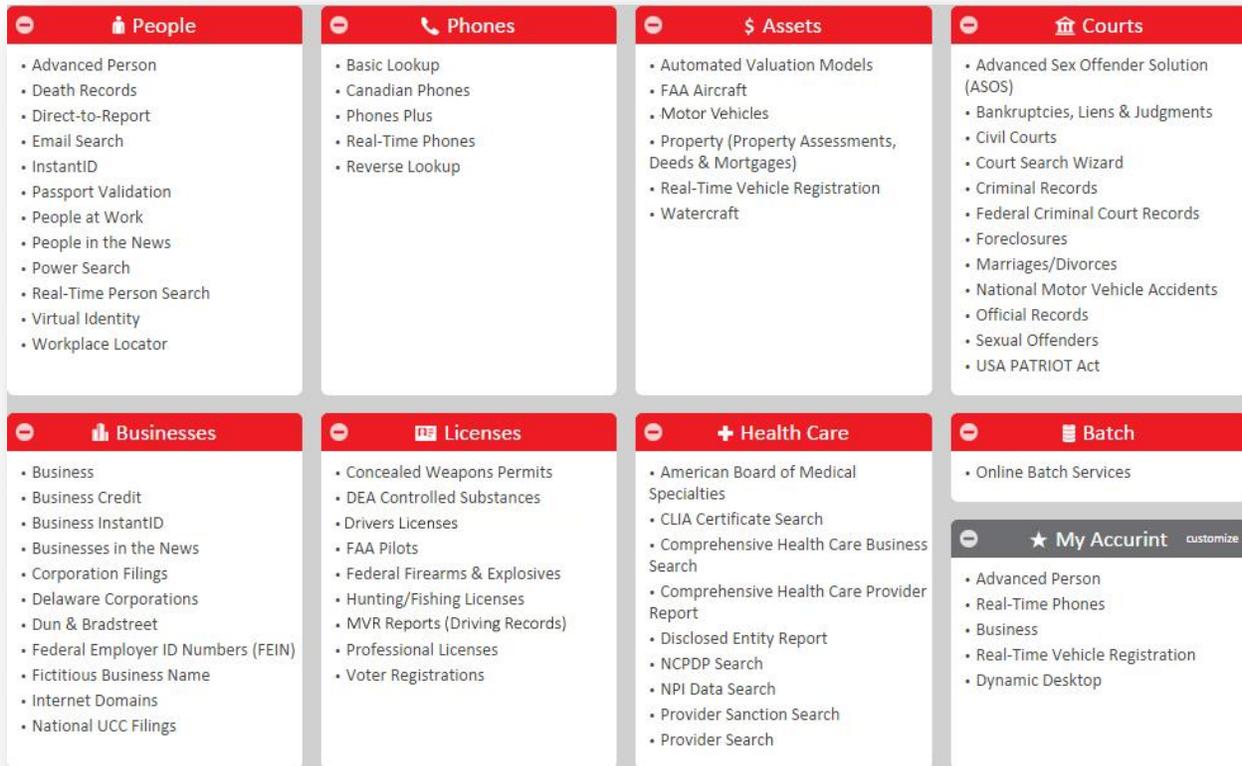

- Last Name
- First Name
- Middle Name/Initial
- SSN
- Date of Birth
- Age Range (with "To" dropdown)
- Alias Last Name
- Relative's First Name
- Other Relative's First Name
- Street Address
- City
- State (dropdown: "All Available States")
- Zip Code
- Previous City
- Previous State (dropdown: "All Available States")
- Other Previous State (dropdown: "All Available States")
- Radius (dropdown: "30 Miles")
- Telephone (with example: "e.g., 456-7890 or (123) 456-7890")

At the bottom right, there are "Search" and "Clear Form" buttons.

SmartLinX Person Search Screen

Accurint for Government

Accurint for Government is a powerful investigative tool already used by thousands of government revenue agencies, entitlements, social services, child support departments, attorneys general offices, public defenders, city and county attorneys, and numerous other agencies across the country. The solution assists them with enforcing laws and regulations, fighting fraud, waste and abuse, and providing citizen-centric services. The Accurint for Government next generation search technology enables government professionals to instantly gather and analyze current, comprehensive and authoritative public records information, allowing agencies to perform their jobs more efficiently and effectively.

The Accurint for Government online home page, shown above, summarizes the solution’s robust search capabilities and public records information.

Accurint for Government Plus

Accurint for Government Plus is an online investigative solution that uses a powerful desktop application to:

- Locate suspects and their associates
- Visualize critical investigative information
- Access and search criminal records
- Uncover fraud

Accurint for Government Plus anticipates the investigative needs of your agency with next-generation features:

- **LexisNexis Relavint Plus Link Analysis Tool** – Allows you to see complex relationships, expand entities to discover new links and integrate your agency's internal data.
- **Drag & Drop Functionality** – Gives you the ability to open multiple windows from your desktop and easily drag and drop data into other windows to expand your analysis.
- **Advanced GIS Mapping** – You can link information to locations to see geo-spatial relationships between people and addresses. With the ability to overlay data onto a map, you gain a better understanding of how entities are related or interconnected.
- **Query Organizer Tool** – Logically and conveniently store and share case information with colleagues.

Instant Verify

Instant Verify performs multiple core system data checks against the LexisNexis collection of robust public records and proprietary databases to ensure that information about a subject, such as a name, address and Social Security Number, match and are valid. In addition, Instant Verify offers age verification checks as options. The outcome of all verification checks can be viewed through a self-service reporting tool.

Instant Verify integrates easily into virtually any point-of-service or online system through a simple XML data interface. The solution works as a stand-alone verification tool with its existing Web application and, because of its configurable architecture, the user interface customizes to minimize user training and support.

Instant Verify:

- Instantly checks a customer's self-entered or self-provided information
- Verifies information against several derogatory databases, including high-risk addresses
- Integrates quickly into existing business processes, third-party, and other Web sites software or hardware.
- Remains transparent to the user.
- Offers integration with the Instant Authenticate workflow, allowing customers to determine next steps based on verification outcome.
- Provides quick response time to support Web site access requirements.
- Supports both real-time and bulk data file submissions.
- Provides flexibility to specify number of verification checks required to –pass verification module.

Instant Authenticate

Instant Authenticate is a real-time interactive authentication quiz that increases the assurance that an individual is who he or she claims to be. The identity authentication solution is not a stand-alone verification process but rather an advanced linking process that reaches across billions of proprietary and non-proprietary public records. This approach produces better and wider quizzing capabilities that are more secure, more fraud-proof and not limited by the types of stand-alone databases used by credit bureaus.

How it works

Using basic information about a customer, Instant Authenticate generates a series of random, multiple choice questions derived from data using public, private, and proprietary databases. As a result, these questions have a high likelihood of being correctly answered only by the proper individual. The system will then generate a pass or fail score for the individual based on the responses to the questions. The number of questions, type of questions and determination of passing score will be determined by the agency. If there is a pass score, the individual will be fully verified. If there is a fail score, the individual can be directed to further verification as the agency deems appropriate (e.g. additional set of questions).

Benefits of Instant Authenticate include:

- Access to our premier data resources with billions of public records and proprietary data.
- Verification of critical identity information of its customers quickly and economically.
- Highly scalable and flexible solution.
- Secure and reliable Web-based solution for instant online access to customer information.
- Seamless integration into an agency's customer-facing applications.

InstantID Consumer

InstantID Consumer is a powerful identity verification, validation and identity fraud prevention tool that quickly and efficiently helps you minimize fraud. The solution quickly and efficiently cross references information against billions of public records. It helps agencies verify essential personal information such as name, address, date of birth, driver's license number and Social Security number (SSN). InstantID combines verification, validation and risk detection processes to instantly verify individual identities, spot potential fraud or identity theft, and automatically flag discrepancies found in an applicant's data, such as: invalid SSN, deceased SSN, SSN issued prior to birth, invalid address(es), prison or campground addresses, SSN associated with a different person, disconnected phones (cell or landlines).

The solution identifies these potentially high-risk data elements and more, and summarizes the results in an easy-to-interpret verification index and an informative score, rather than a pass/fail designation. It also performs an automatic check of the Office of Foreign Assets Control (OFAC) list of known terrorists. As it searches for information, InstantID alerts you to any potential data mis-keys and returns a list of suggested corrections. It also returns alternatives for any elements that cannot be verified.

InstantID Q&A

LexisNexis InstantID Q&A, with knowledge-based authentication (KBA), is the easy, real-time way to fight identity fraud at the point of customer contact. KBA employs sophisticated analytics to build a comprehensive knowledge profile that guides the consumer through an intuitive, Q&A interactive process. KBA enables a smarter authentication process.

Consumer-friendly questions power our query-based approach to mitigating risk. As fraudsters become more sophisticated, you need even more advanced tools to protect your organization, prevent and detect identity theft and remain compliant. You can meet this challenge with InstantID Q&A. This powerful tool uses more than 300 different points of configuration, historical data covering topics such as familial relationships and former residences to generate a large set of questions for every individual. All customizable to meet your risk policy requirements.

LexisNexis InstantID Q&A powered is the easy, real-time way to fight identity fraud at the point of customer contact. KBA employs sophisticated analytics to build a comprehensive knowledge profile that guides the consumer through an intuitive, Q&A interactive process. Flexible, artificial system intelligence dynamically develops multiple answers to personal questions at various knowledge levels. So it’s easy for you to adapt the process to your policies, measure risk as questions are asked; easy for consumers to respond; and hard for fraudsters to detect question cycles.

Our advanced data-linking technology combines real-time access to billions of public records and –non-credit data to generate reports and provide a robust source of –Q&As. So you can use InstantID Q&A as a primary or secondary verification tool.

Batch Processing

LexisNexis Batch Solutions offer fully automated search and delivery services featuring pinpoint search logic and providing cost-effective, high-speed results.

What makes LexisNexis unique in the batch market is our ability to work with any data input set and return customized, on-point results with a processing speed that is unmatched. We build a Batch design approximately five business days after we receive the input file. Once the Batch is in production, the average turnaround time is less than 24 hours.

While most data providers require their customers to follow strict input/output layouts and file transfer methods, LexisNexis creates layouts and methods based on customer requirements. We can do this because we support a multitude of delivery options and input and output file-naming conventions.

LexisNexis will accept your files via mutually acceptable format. The secure delivery options we support include:

- Secure FTP (SSH, SSL, or PGP Encryption)
- FTP with PGP encryption of the file
- Batch Web Gateway (SSL Encryption)

LexisNexis will conduct the entire process in a secure environment. We take the responsibility to protect the data our solutions are built on with the maximum level of security. We have taken a leadership role in developing the standard for data protection and apply policies and procedures well beyond minimum requirements for regulatory compliance. The constant auditing and validation of our systems and procedures by reputable external auditing firms is an indication of our commitment to the highest quality standards. Our WebTrust certification (together with many other certifications that we have received) reflects the completeness of our operations in areas such as security, privacy, processing integrity and availability.

LexID Batch

One batch processes agencies may purchase is the Link ID batch (i.e. Accurint Data Link batch). To help agencies reduce fraud and determine identities of individuals, LexisNexis delivers a powerful entity resolution and data linking solution called LexisNexis Link ID. The core technology, which is proprietary to LexisNexis, is used to help ensure the integrity and accuracy of each unique individual person or business contained in your data and across multiple databases. LexisNexis can accept from the agency high volumes of data about business or individuals (combinations of names, addresses, phone numbers, Social Security numbers, dates of birth, drivers license numbers, etc.). Using that information, LexisNexis provides a unique numerical ID or the best information we have for each individual in the LexisNexis database.

Provider Integrity Scan & Score Batch

LexisNexis Provider of Interest Score analyzes patterns, using predictive modeling to identify fraud that is not highlighted by rules-based systems. Rather than telling the software what to look for (as happens with rules-based systems), predictive modeling uses statistical techniques to identify combinations of factors that should be analyzed as fraud, waste and abuse (FWA) indicators. LexisNexis builds a custom model for each customer. Previously identified FWA can "seed" a model, and the model can take account of client policies. Models can also be built without previously identified problems. Custom models take into account factors such as differences in diagnosis and treatment patterns by geography, as well as the customer's policies and available resources.

LexisNexis Identity Contact Resolution Batch: Identity Locator for Collections & Returned Mail

This Solution allows your Department to more efficiently and cost-effectively collect your current debt as well as more of the old debt that is considered uncollectable due to outdated or missing debtor identity information. This is done by way of resolving the identity, appending the most recent information to that identity, and assessing the contact-ability of the person and the collectability of the debt. This also allows your Department to expand the reach of intercept lists and debt offset programs by adding/verifying particular identity components. This product is also highly configurable.

Accurint for Law Enforcement

Accurint for Law Enforcement is a proven and effective tool already used by over thousands of federal, state and local law enforcement agencies across the country. Solve cases faster by leveraging the power of next-generation search technology that enables you to quickly gather and analyze comprehensive and current information from the LexisNexis catalog of public records.

Accurint for Law Enforcement enables you to quickly and efficiently:

- Locate people and apprehend suspects
- Discover association
- Uncover assets
- Investigate businesses
- Visualize complex relationships
- Map locations

Comprehensive and authoritative information includes:

- Phone numbers, including possible cell phones
- Assets, including motor vehicles, watercraft and aircraft
- Bankruptcies, liens and judgments
- Real property records

Accurint XML Integration

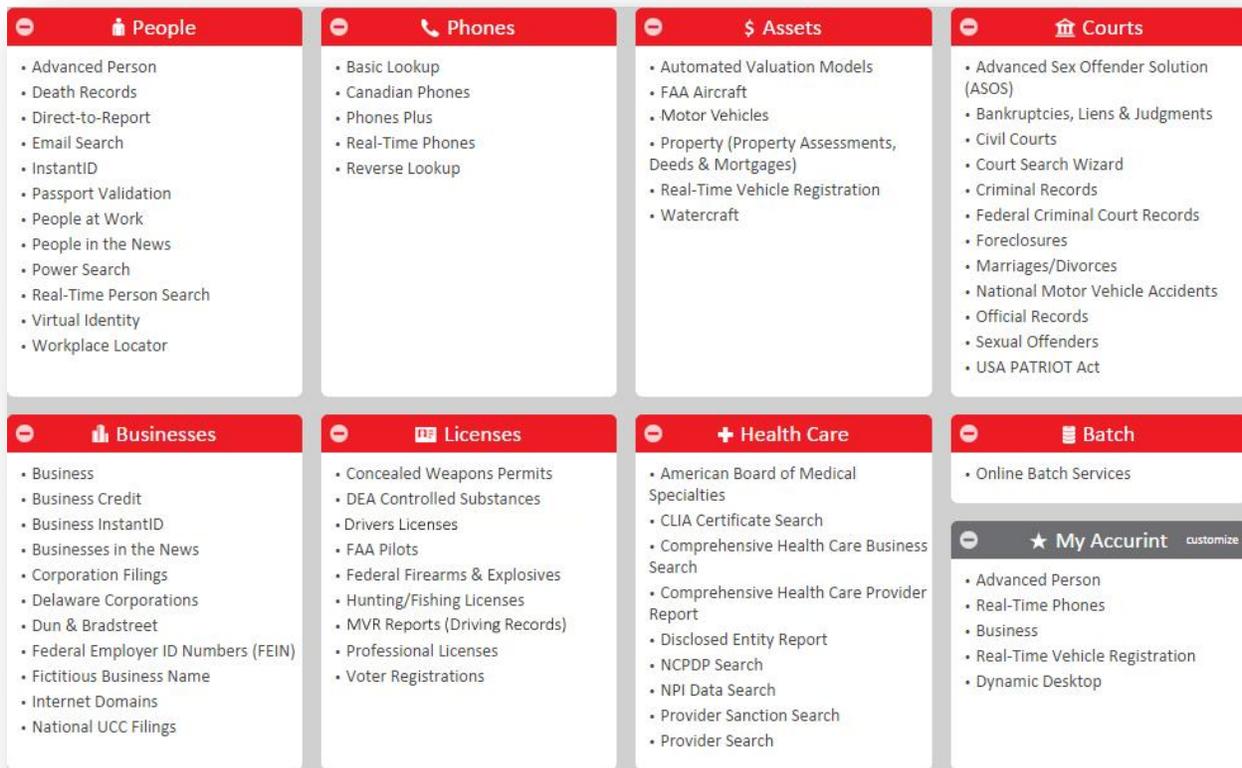

LexisNexis offers Accurint through an XML-based Application Programming Interface (API). It gives developers powerful, easy-to-use resources for seamlessly integrating access to Accurint data into your own or third party applications. LexisNexis XML Integration can work with you to ensure a seamless sharing of information so that LexisNexis data requests are sent and received through a customized application.

XML Interface

LexisNexis uses Extensible Markup Language (XML) to encode submitted requests as well as to return responses. Simply post XML data to a secure Website using the HTTPS protocol with UTF8 character encoding. An XML response is returned with UTF8 character encoding.

System Security

Connection to LexisNexis Risk Solutions is made over a secure connection to the Internet using a Verisign Certificate, so your information is always safe.

The Accurint for Law Enforcement online home page, shown above, summarizes the solution’s robust search capabilities and public records information.

MVR Wildcard Search

Accurint for Law Enforcement provides an MVR Wildcard search that allows you to query combinations of motor vehicle data. MVR Wildcard Search accesses motor vehicle data to run matches on partial license plate tags as well as car makes, models, colors. For example, you can run a query to find all red Fords within a State, which have a D as the second character with ?D* in the tag field.

Accurint LE Mobile

With Accurint LE Mobile, authorized users can access all of the proprietary information provided on Accurint LE from any handheld wireless device. Accurint LE Mobile operates through an easy-to-navigate wireless interface over any Palm OS™, Windows® CE, or Research in Motion (RIM) Blackberry® device with a Web browser that supports .html. The fully integrated wireless offering delivers 24/7 access to Accurint’s proprietary database containing billions of records at no additional cost.

LexisNexis Investigators Network

The LexisNexis Investigators Network, accessible through Accurint, is designed to provide peer-to-peer networking capability between law enforcement investigators currently subscribing to the LexisNexis' Accurint service. It's available at no extra cost. Law enforcement investigators and analysts will be able to benefit from networking with peers, sharing professional experiences, learning from subject matter experts, and keeping in touch with the latest news, alerts, training and events.

Benefits:

- **Learn** – Access tips from fellow investigators and other resources to help develop your leads.
- **Connect** – Exchange real-world experiences—both challenges and successes—with law enforcement peers across the nation.
- **Help** – Share expertise and insights to help each other work more effectively and efficiently – when law enforcement talks, crimes get solved.

Extraordinary Speed

On average, a full LexisNexis comprehensive report, including 3 degrees of separation for relatives, will run in 5 to 10 seconds. This is an order of magnitude faster than reports delivered by any of our competitors. Why is this important? In an investigation, the quicker you can obtain the information you need the quicker you can make a decision. Waiting minutes for each piece of information to return may add hours to the time you spend retrieving information on a case ... time that could be spent solving crimes.

Accurint for Law Enforcement Plus

Whether you're trying to locate suspects, investigate fraud or uncover assets, Accurint for Law Enforcement Plus increases your efficiency and saves you time by bringing together a comprehensive suite of tools to help you find vital information and solve cases faster. LexisNexis Accurint LE Plus anticipates the investigative and intelligence needs of your agency.

Key features and benefits include:

- LexisNexis Relavint Plus Link Analysis Tool – Allows you to see complex relationships, expand entities to discover new links and integrate your agency's internal data.
- Drag & Drop Functionality – Gives you the ability to open multiple windows from your desktop and easily drag and drop data into other windows to expand your analysis.
- Advanced GIS Mapping – Link information to locations to see geo-spatial relationships between people and addresses. With the ability to overlay data onto a map, you gain a better understanding of how entities are related or interconnected.
- Wildcard Vehicle Search – Initiates searches even with partial or incomplete vehicle descriptions and/or license tag numbers.
- Generate Photo Lineups – Selects and sorts publicly available Department of Corrections, sex offender, or agency-specific photographs and arrange for simultaneous viewing.

- Query Organizer Tool – Stores and shares case information with colleagues logically and conveniently.

Investigative Portal

The LexisNexis Investigative Portal provides access to public records (including SmartLinx reports), news, and court filings – all from a single powerful Web page interface. It provides simple, one-click access to a comprehensive range of investigative, fraud prevention/detection, and risk management solutions. Whether you simply need to verify the identification of a person or business, or you need to conduct investigations for preventing and detecting fraud, we've considered every possibility and provided for every need with this one, easy-to-use solution.

Search results include all items and more depicted in the screenshot below.

The Investigative Portal home page, depicted in this screenshot, demonstrates the breadth of public records information available.

ProMonitor

With ProMonitor, you can receive alerts – via email, fax, XML, or server to server – when there are indications of activity for wanted persons. ProMonitor can help you: reduce warrant case load, generate new leads, improve homeland security, receive automatic alerts on potential new leads, reduce hours spent on felony investigations, and increase department efficiency.

ProMonitor continually tracks profile patterns, comparing key information such as address, telephone and asset information against several public, private and proprietary LexisNexis databases. If significant identity variables in a profile change, ProMonitor alerts you to potential security threats or location of wanted persons. The solution helps you track a profile for substantial changes or new information:

changes of names and addresses, new aliases, duplication of social security numbers, criminal activity, suspicious high-value purchases, possible fugitive locations, and more.

LAW ENFORCEMENT INVESTIGATIVE SERVICES

Accurint for Law Enforcement

Accurint for Law Enforcement is a proven and effective tool already used by over thousands of federal, state and local law enforcement agencies across the country. Solve cases faster by leveraging the power of next-generation search technology that enables you to quickly gather and analyze comprehensive and current information from the LexisNexis catalog of public records.

The solution helps you track a profile for substantial changes or new information: changes of names and addresses, new aliases, duplication of social security numbers, criminal activity, suspicious high-value purchases, possible fugitive locations, and more.

Social Media Monitor

Social Media Monitor (SMM) from LexisNexis expands investigators' ability to locate suspects, discover criminal activity and gather evidence to help prevent crime. The solution is accessible through the online Accurant solution. SMM will allow you to discover risks and diffuse threats using social media. This new capability can alert investigators to potential areas of concern and help them identify posts or tweets within specific geographic locations. This adds a virtual dimension to investigations, enabling law enforcement to verify identities, uncover non-obvious associations and generate a comprehensive view of a suspect.

Investigative Role	Description	Pricing							
General									
Lexis Advance public records	The user interface is identical to other Lexis Advance research screens for legal research, providing terms & connectors (Boolean) and Natural Language search logic.	Number of users in agency		Price per user, per month, per agency					
		1 to 10		\$95					
		11 to 99		\$76					
		100 to 499		\$63					
		500 to 999		\$51					
SmartLinx	Accessible via <i>lexis.com</i> , lets you quickly comb through billions of records simultaneously, making it easy to create comprehensive reports that connect names, addresses, phone numbers and other information with appropriate people, businesses and locations.	Number of users in agency		Price per user, per month, per agency					
		1 to 10		\$120					
		11 to 99		\$96					
		100 to 499		\$80					
		500 to 999		\$64					
		1,000+		\$48					
Accurint for Government	A powerful Web-based tool already used by thousands of government revenue agencies, entitlements, social services, child support departments, attorneys general offices, public defenders, city and county attorneys, and numerous other agencies across the country. The solution assists them with enforcing laws and regulations, fighting fraud, waste and abuse, and providing citizen-centric services. The Accurint for Government next generation search technology enables government professionals to instantly gather and analyze current, comprehensive and authoritative public records information, allowing agencies to perform their jobs more efficiently and effectively.	<p align="center">Pricing is per agency, per user, per month. Product Offering - Batch

Batch Services are our user friendly solution to assist your agency in evaluating data efficiently. Our procedures include standardization and normalization of data that utilize over 100,000 rule sets for address hygiene, name matching and the identification of mis-keyed data and other anomalies. The result is data that is current, policy compliant and immediately useful. Batch services will enable government agencies to verify best addresses & phone numbers, detect & prevent fraudulent and improper payments, locate fugitives, suspects & witnesses, locate beneficiaries, loan defaulters &, non-custodial parents, minimize returned mail, and update & maintain the quality of internal databases.
