Application for Appraised Value Limitation on Qualified Property (Tax Code, Chapter 313, Subchapter B or C)

INSTRUCTIONS: This application must be completed and filed with the school district. In order for an application to be processed, the governing body (school board) must elect to consider an application, but — by Comptroller rule — the school board may elect to consider the application only after the school district has received a completed application. Texas Tax Code, Section 313.025 requires that any completed application and any supplemental materials received by the school district must be forwarded within seven days to the Comptroller of Public Accounts.

If the school board elects to consider the application, the school district must:

- notify the Comptroller that the school board has elected to consider the application. This notice must include:
 - the date on which the school district received the application;
 - the date the school district determined that the application was complete;
 - the date the school board decided to consider the application; and
 - a request that the Comptroller prepare an economic impact analysis of the application;
- provide a copy of the notice to the appraisal district;
- must complete the sections of the application reserved for the school district and provide information required in the Comptroller rules located at 34 Texas Administrative Code (TAC) Section 9.1054; and
- forward the original hard copy of the completed application to the Comptroller in a three-ring binder with tabs, as indicated on page 9 of this application, separating each section of the documents, in addition to an electronic copy on CD. See 34 TAC Chapter 9, Subchapter F.

The governing body may, at its discretion, allow the applicant to supplement or amend the application after the filing date, subject to the restrictions in 34 TAC Chapter 9, Subchapter F.

When the Comptroller receives the notice and required information from the school district, the Comptroller will publish all submitted application materials on its website. The Comptroller is authorized to treat some application information as confidential and withhold it from publication on the Internet. To do so, however, the information must be segregated and comply with the other requirements set out in the Comptroller rules. For more information, see guidelines on Comptroller's website.

The Comptroller will independently determine whether the application has been completed according to the Comptroller's rules (34 TAC Chapter 9, Subchapter F). If the Comptroller finds the application is not complete, the Comptroller will request additional materials from the school district. Pursuant to 9.1053(a)(1)(C), requested information shall be provided within 20 days of the date of the request. When the Comptroller determines that the application is complete, it will send the school district a notice indicating so. The Comptroller will determine the eligibility of the project, issue a certificate for a limitation on appraised value to the school board regarding the application and prepare an economic impact evaluation by the 90th day after the Comptroller receives a complete application—as determined by the Comptroller.

The school board must approve or disapprove the application not later than the 150th day after the application review start date (the date the application is finally determined to be complete), unless an extension is granted. The Comptroller and school district are authorized to request additional information from the applicant that is reasonably necessary to issue a certificate, complete the economic impact evaluation or consider the application at any time during the application review period.

Please visit the Comptroller's website to find out more about the program at www.texasahead.org/tax_programs/chapter313/. There are links to the Chapter 313 statute, rules, guidelines and forms. Information about minimum limitation values for particular districts and wage standards may also be found at that site.

Detailed Description of the Project

Provide a detailed description of the scope of the proposed project, including, at a minimum, the type and planned use of real and tangible personal property, the nature of the business, a timeline for property construction or installation, and any other relevant information.

Praxair's project provides for the design and construction of a new industrial gas plant designed to produce carbon monoxide, hydrogen, and steam.

If approved, the proposed industrial gas complex will be constructed on property leased from Celanese at their Pasadena, TX, chemical complex. Construction is anticipated to begin in 1Q 2018 with commencement of commercial operations in 4Q 2019. The Company's vast pipeline network allows Praxair to meet the industrial gas needs of major customers in some of the largest industrial basins in the United States. This project could be built and installed anywhere on the pipeline network that runs through the Texas and Louisiana Gulf Coast. A positive determination on the Value Limitation Application enhances the viability of the project in Texas.

Below is a list of the major equipment comprising the complex:

- Fired heater with NO_x reduction system
- Catalyst-filled reactor vessels
- Heat exchangers
- Compressors
- CO and H₂ purification equipment
- Steam drum and deaerator
- Flare system
- Pumps
- Filters
- Insulation
- Electrical
- Switchgear
- Transformers
- Instrumentation equipment
- Equipment and structural foundations and supports
- Control Equipment
- Industrial gas piping
- In-plant roads

Additional infrastructure to support this property will include:

- Site development/roads
- Utility piping

Documentation to assist in determining if limitation is a determining factor.

Praxair is a Fortune 500 company headquartered in Danbury, Connecticut. The company employs over 27,000 people worldwide and has key locations in Connecticut, Illinois, Indiana, New York, Texas, Georgia, Iowa, and California. It is a leading industrial gas producer in the Americas. Praxair products include atmospheric, process and specialty gases and related services and technologies. Having diverse sources of industrial gases helps attract other businesses that rely on such products; supply of industrial gases is a critical utility for many businesses. Praxair will use its industrial gases pipeline network to import and export gases from the proposed complex to serve the other petrochemical facilities along the Gulf Coast. Today, Praxair serves approximately 25 industries as diverse as healthcare and petroleum refining, computer-chip manufacturing and beverage carbonation, fiber-optics and steel making, aerospace, chemicals and water treatment.

Praxair's pipeline complex allows it to have options for our investments. A variety of factors are considered in selecting site location, including the local pool of available skilled workers, costs for natural gas and ease of doing business as it relates to permitting and incentives to reduce risk in investments.

The applicant requires this appraised value limitation in order to move forward with the development of the project. Without this appraised value limitation, the impact of comparatively high Texas property taxes on the cost of the project does not allow the project to compete for global customers against similar projects operated by competitors of Praxair in the U.S. and around the world. While Praxair has signed a contract to supply Celanese, without this appraised value limitation Praxair would have to strongly consider making this investment at another site. Approval of this Value limitation application allows us to extend our relationships in Texas and be a contributor to the state's economic growth story.

Description of all property not eligible to become qualified property (if applicable)

This proposed project would be placed on land leased from Celanese. Equipment currently in the proposed project area consists of a combined cycle and cogeneration facility utilizing three combustion turbines and heat recovery steam generators and steam turbines all of which is owned by Clear Lake Cogeneration LP. All equipment currently in the proposed project area will be dismantled and removed prior to the commencement of any work on the proposed Praxair project. I have contacted the Appraiser for the HCAD and he has confirmed that the existing property that will be dismantled and removed is associated with HCAD account numbers 1005150000624, 1005150000384, 0414963 and 0647994. The total current value shown by HCAD for these four accounts is \$10,609,848. Maps showing the existing property and HCAD Records for the four accounts are attached.

Area outlined in blue contains existing equipment which will all be removed prior to beginning construction on the proposed Praxair project

Re: Chapter 313 Jobs Waiver Request

Dear Superintendent Graham,

Praxair, Inc. requests that the La Porte Independent School District's Board of Trustees waive the job requirement provision as allowed by Section 313.025(f-1) of the Tax Code. This waiver would be based on the school district's board findings that the jobs creation requirement exceeds the industry standard for the number of employees reasonably necessary for the operation of the facility of the property owner that is described in the application.

The employment industry standard for the facility that is proposed is 18 permanent jobs. Praxair Inc. requests that the Board of Trustees make such a finding and waive the job creation requirement for 25 permanent jobs and in line with industry standards and consistent with recently awarded waivers within this industry, Praxair Inc. has committed to create eighteen (18) total jobs for the project.

Sincerely,

Sam Gregson
